Subject: Recommendation by Mr Anthime LEMAGNEN

Montpellier, 17 September 2024

Dear Madam, Sir,

Mr. Anthime LEMAGNEN, an engineering student in Information Systems and Industrial Engineering, tells me of his desire to evolve within your laboratory as part of his international internship during his fourth year. Having followed this student during his first four semesters of training at the EPF Engineering School as a teacher of physical and electronic systems, I strongly encourage him in his process of integrating into [REDACTED]

Indeed, Anthime has demonstrated his interest in the physical sciences and in particular electronics on many occasions and in particular in the context of several projects such as the construction of a domestic wind turbine. His leadership has often positioned Anthime as a project manager and his natural curiosity is an essential quality in the field of research. This student really stood out from the others by her open-mindedness, her motivation and her involvement during her school career.

Currently an apprenticeship student, I was able to measure his investment as well as his ease of integration within a professional structure.

In view of his technical and human qualities, I strongly support Mr Anthime LEMAGNEN in his project, and I sincerely hope that he will be able to convince [REDACTED] to select his application.

I remain at your disposal for further information and ask you to kindly receive my respectful greetings,  
Madam, Sir.
